Title: Wireless Hotspot Connection – Conditions and Terms of Use

1. Because wireless connections have a limited broadcast range and many factors can cause connection interference (both physical structures and electronic signals), the Library is not liable for any loss of connection and the resulting loss of data being transmitted.
2. Through the Wireless Hotspot Connection, the Library is providing access through a wireless internet connection, without access to services available on the public wired network (e.g. printing, scanning, etc.)
3. Wireless connections may be less secure than wired connections and can be intercepted. The Library is not liable for any loss suffered from data interception. The Library assumes no responsibility for the safety of user equipment.
4. When accessing the Wireless Hotspot Connection, the user is agreeing to the terms and conditions of the Bon Accord Public Library Policy #701
